MEHTA
TECHNOLOGIES

Brand Guidelines

Version 1.0 · November 2026

01 — THE BRAND

Technology that helps businesses grow

Mehta Technologies is an Indian website and software development company. We design and build websites, e-commerce stores, web applications, CRMs, ERPs and custom software for growing businesses, and we build our own in-house SaaS products.

We are a lean, fast-moving team that delivers quickly without compromising on quality. Our brand should feel like a serious technology partner: clear, reliable and built to last.

Brand personality

CONFIDENT · MODERN · PRECISE · AMBITIOUS · APPROACHABLE

02 — LOGO

Our logo

MEHTA
TECHNOLOGIES

Primary lockup

The symbol sits above the wordmark: **MEHTA** in bold, wide-spaced capitals with **TECHNOLOGIES** in lighter capitals set to the same width. Use the full lockup wherever there is room.

What it means

- **The M:** two tall peaks form the letter M for Mehta Technologies.
- **The peaks:** ambition and reaching higher, for us and for our clients.
- **The arrow:** the centre arrowhead points upward. It stands for growth, progress and direction, and doubles as a cursor.

The **symbol** can be used on its own for app icons, favicons, profile pictures and merchandise.

03 — LOGO VERSIONS

Always white or black

The logo is never recoloured. Use the white logo on dark brand colours and the black logo on light ones.

White on Midnight

Primary dark version

Black on white / Cloud

Primary light version

White on Mehta Cobalt

For brand-accent moments

White on Deep Navy

Cards, footers, merchandise

Symbol-only versions for app icons, favicons and social profile pictures. Keep the symbol centred with generous padding inside square or round frames.

04 — LOGO RULES

Space, size and misuse

Clear space

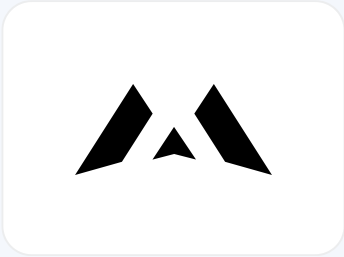

x = the width of the centre arrowhead. Keep at least this much empty space on every side of the logo.

Minimum size

Full lockup	**30 mm print · 120 px screen**
Symbol only	**8 mm print · 24 px screen**

Don't

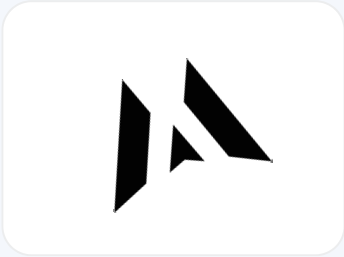

✕ Stretch or squash it

✕ Recolour it, even in brand colours

✕ Add gradients or effects

✕ Rotate or tilt it

✕ Place it on low-contrast colours

✕ Retype or rearrange the wordmark

Always use the master logo files. Never take the logo from AI-generated mockups or screenshots, as they distort the shapes.

05 — COLOUR PALETTE

Midnight & Cobalt

Deep navy foundations, one confident signature blue, and a small spark of lime that makes the brand ours.

SIGNATURE

Mehta Cobalt

HEX #1F4FFF · RGB 31 79 255

SPARK

Signal Lime

#C8F560

STATUS COLOURS (SOFTWARE ONLY) Success #1FA971 Warning #F5A524 Error #E5484D

Balance and contrast

Proportions

Signal Lime stays **under 5%**: a badge, an underline, one highlighted word. Never use it for large areas or body text.

Readable pairings

White on Cobalt 5.8:1 ✓	White on Midnight 18.8:1 ✓
Ice Blue on Midnight 9.3:1 ✓	Mist on Midnight 8.3:1 ✓
Slate on Cloud 7.1:1 ✓	Midnight on Lime 14.9:1 ✓

Avoid

White on Lime 1.3:1 ×

Ice Blue on light 1.9:1 ×

- Highlight one key phrase per headline: Cobalt on light backgrounds, Ice Blue on dark.
- Buttons: Cobalt with white text. Secondary buttons: outline in Midnight (light) or Mist (dark).
- Prefer the peak and grid patterns over stock photos or gradients for backgrounds.
- Body text sits at 4.5:1 contrast or higher.

Patterns and icons

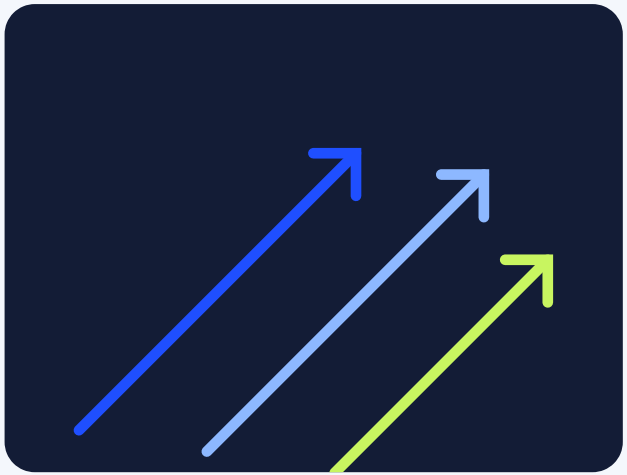

Peak pattern

The logo shapes repeated as outlines. For backgrounds, covers and merchandise. Keep it subtle.

Blueprint grid

The logo's construction lines. Signals precision and engineering. For documents and light layouts.

Growth lines

Upward diagonals echoing the arrowhead. Use for ads and social posts about results.

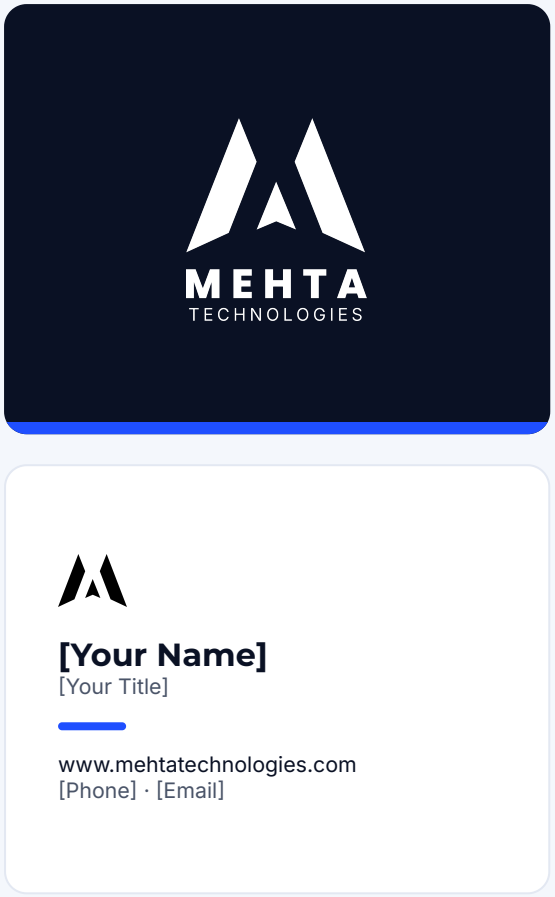

Icon style

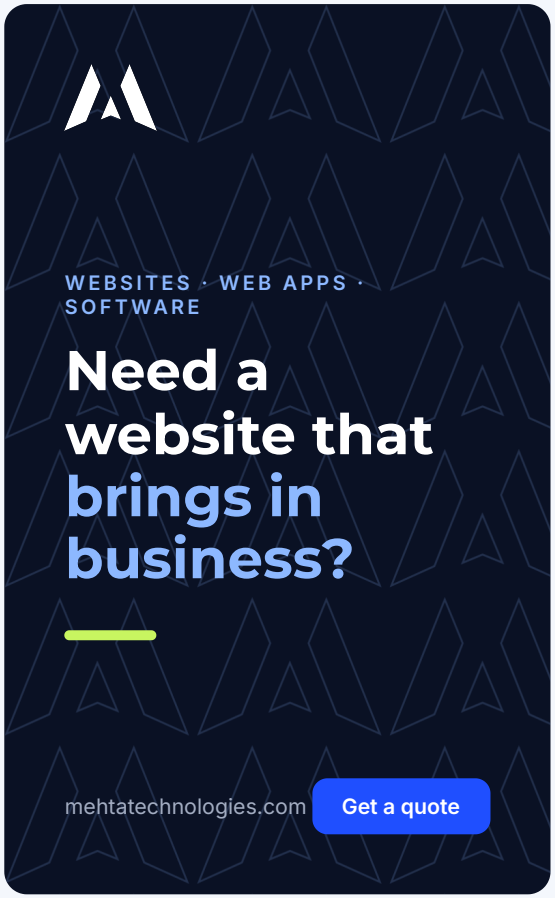

Simple outline icons with a consistent stroke and rounded ends, in Midnight or Cobalt. **Avoid:** stock skyscrapers, circuit boards, glowing globes, heavy gradients and neon glows.
